SUMMARY

Front-End Developer with a solid foundation in web design and development, enhanced by extensive project management and creative problem-solving skills from a 15-year career in the film industry. Proficient in HTML, CSS, JavaScript, React, and various other technologies. Committed to continuous learning and delivering high-quality, user-friendly web solutions.

PROFESSIONAL EXPERIENCE

DataAnnotation

Data Annotation Specialist (Freelance)

Remote | 08/2023 – Present

Conduct high-quality data labeling to train machine learning models, contributing to the improvement of AI systems. Select and manage diverse projects, ensuring completion within tight deadlines while maintaining high accuracy and quality standards. Effectively manage a self-directed work schedule, balancing multiple projects and personal commitments to consistently meet deadlines.

Freelance

Front End Developer

Toronto, ON | 10/2022 – Present

Built custom web applications for clients and self-driven projects.

VimKeyboard: UI/UX design for a Vim Motions learning aid.

Hue-Rotate: Tool for calculating hue-rotate for SVGs.

PixlPal: macOS color picker app. Designed for developers and content creators. Successfully launched on the Apple Store.

Seminar on the Seas: Responsive web app with a mobile-first design. Managed projects, UI/UX design, and client interactions. Future implementations include authentication and a user database.

Sharaoke: Web-based Karaoke App with YouTube V3, Web Audio, and OpenAI API integration. Managed client interactions and system audio integration.
